OBJECTIVE :

Highly motivated 1st year BS Computer Science student at GC University, and interested in being selected for Sakura Science Exchange Program (Course C: AI/ML Training). Interested in quickly learning and understanding the technical terms of both Machine Learning and Deep Learning to help in future research on AI and help fill technology gaps.

EDUCATION :

Government College University (GC) ,Lahore

BS Computer Science | 2026_present

Relevant Coursework: Introduction to Coding (A+), Calculus (A), Statistics (A+), linear Algebra (A-)

ACADEMIC PROJECTS AND MINI HACKATHONS (Focus On AI\ML) :

1.Plant Disease Detection using CNNs:

Created a simple Convolutional Neural Network (CNN) model to classify plant leaves and understand healthy and diseased leaves using Python and TensorFlow. Reached an accuracy of 85% in a test set.

2.Linear Regression Model for Housing Prices:

Created a linear regression model from scratch using NumPy and a simple dataset, predicting house prices from the data.

TECHNICAL SKILLS :

Language: Python (proficient), C++

Framework and Tools: Tensor Flow, Data Visualization,pandas, numpy, Git, VS Code & Jupyter notebook

SAKURA SCIENCE PROGRAM INTEREST:

Why Japan:

Intrigue around Japan's 'Society 5.0' concept and its position at the forefront of AI innovation. Enthusiastic about the Course C with a particular interest in using advanced neural network architectures and the Japanese research approach.

AWARDS & ACHIEVEMENTS:

- Dean's List (Fall 2024)
- 2nd Place, Intra-University Coding Challenge (Nov 2025)

EXTRACURRICULAR ACTIVITIES:

- Member, GC AI Club
- Volunteer, local STEM outreach program
